

1 Basics

This is stuff that's framed.

Note that the

framed

stuff is a block!

This is stuff that's framed.
And it can hold multiple paragraphs.

And even stuff in multiple Paragraphs.

Does this work? But not in LaTeXML!

2 Variants

This is stuff that's framed, but would stay open at page breaks. This doesn't make so much sense for LaTeXML, so it's pretty much the same.

This is stuff that's shaded green; should fade into the margin, whatever that means.

This is stuff that's shaded green; it should end sharply at the margin.

This is stuff that's snugly shaded green; fading into the margin.

This is stuff that's snugly shaded green; ending sharply at the margin.

■ This is with a left bar, like a changebar?

A Titled Frame

This is a titled frame.
